

Experience...the Difference.

"I put it off for a very long time because I've had anxiety and dental problems since I was very young. Since having my work done here, I have had more confidence than I've ever had. The doctor was amazing, and he did a wonderful job of putting my mind at ease and telling me about the entire process start to finish."—**Chrissy**

Q: I have a chronic fear of dental work and heard of oral conscious sedation. What is it exactly?

A: Oral conscious sedation allows a patient to be in a relaxed state between being asleep and awake throughout an entire visit. To achieve this, we administer nitrous oxide anesthesia, which has been used safely for years and has found a home in dentistry for both kids and adults. Here at Kremer Dental Care, we are glad to offer the comfort of oral conscious sedation at both of our locations in Chico.
