

What would be your dream concert?

manager

I guess seeing Queen with Freddie Mercury would be pretty good. I've just watched the videos. There's that one [at the US Festival], that's one of the best concerts of all time.

Gabii Luscher
bartender

I would love an entire jam-band lineup: String Cheese Incident [etc.]—just a bunch of cool bands.

Louis Sterback

production

The [Red Hot] Chili Peppers are really good. And honestly, you're going to hate me for this, but The Chainsmokers put on a really cool pyrotechnics show.

Dago Rodriguez
car detailer

Maybe like a Prince concert. I didn't get the chance to see him. Prince is the guy. "When Doves Cry," I like that one.

Department of Toxic Substance Control

August 2019

Public Notice

The mission of DTSC is to protect California's people and environment from harmful effects of toxic substances by restoring contaminated resources, enforcing hazardous waste laws, reducing hazardous waste generation, and encouraging the manufacture of chemically safer products.

Cleanup Plan Remains Protective Former Chico Manufactured Gas Plant Site 825 West 2nd Street, Chico, California 95928

The Department of Toxic Substances Control (DTSC) has completed a Five-Year Review to confirm the continued effectiveness of cleanup activities at Pacific Gas and Electric Company's (PG&E's) former Chico Manufactured Gas Plant (MGP) located at 825 West 2nd Street in Chico, California (Site). From 1874 to 1928, a MGP operated across two parcels on the southeast side of Second Street. The MGP provided gas for the community. The plant was abandoned and dismantled by 1930, except for a gas holder and generator building. Today, only the generator building remains on the southwest side of Orange Street, which PG&E uses as an electrical substation and carpentry shop. The other parcel is a paved parking lot owned by the California State University.

As a result of historic operations, polycyclic aromatic hydrocarbons (PAHs) and total petroleum hydrocarbons (TPH) were found in soil and groundwater samples collected from the Site. PG&E implemented a DTSC-approved cleanup that included the removal of contaminated soil in 2006, 2007, and 2010. The remedy also included ongoing groundwater monitoring, and the placement of land use restrictions on the Site to restrict future property and groundwater uses. PG&E continues to monitor groundwater semi-annually and to inspect the Site annually for compliance with the Land Use Covenant (LUC) restrictions. The LUC limits the Site's land use to industrial/commercial use and requires a soil management plan for disturbance of any areas where possible MGP contaminants remain.

This review concluded that the remedy remains protective. DTSC also concluded that the groundwater plume is stabilized and slowly decreasing through monitored natural attenuation. DTSC accepts the report as final; however, PG&E's recommendations on reducing the groundwater monitoring frequency and decommissioning wells are not approved until an updated Groundwater Monitoring Decision Tree is established. This Decision Tree will determine the method used to test the well, depending on location, depth, and frequency. On March 28, 2019, DTSC placed an advertisement in the Chico Enterprise Record to notify the public before conducting the Five-Year Review.

PUBLIC INVOLVEMENT:

Community involvement is an important part of the Five-Year Review Process. If you have any questions or comments regarding the Site and the Five-Year Review, please send your comments to Mera Golo, DTSC Project Manager, 8800 Cal Center Drive, Sacramento, CA 95826 or Mera.Golo@dtsc.ca.gov.

WHERE CAN I VIEW PROJECT DOCUMENTS?

Project documents are available at the following locations:

- https://www.envirostor.dtsc.ca.gov/public/profile_report?global_id=04490019
- Butte County Library, 1108 Sherman Avenue, Chico, CA 95926, (530) 891-2726, Call for hours
- DTSC - File Room, 8800 Cal Center Drive, Sacramento, CA 95826, (916) 255-3758, Call for an appointment

FOR MORE INFORMATION:
