## Experience...the Difference.

"I smiled less because I didn't want to be embarrassed by somebody seeing the anchor for my partial. Dr. Kremer explained Hybridge Implants in detail to me, what was involved and that was the obvious choice for me. Now I feel more confident. I recommend Dr. Kremer... Everybody is so friendly, and they make you feel comfortable." — Ray

### Q: I'm tired of my partial coming loose, is there a permanent solution?

A: Yes! If you're considering an upper or lower full arch dental implant bridge, or maybe even a full-mouth of restorations, the Hybridge Full Arch treatment is the most quick and cost effective answer. The final restoration is a chrome cobalt bridge replacing up to 12 teeth which is supported on five or six dental implants. By attaching permanently to the implants, instead of the gums or natural teeth, Hybridge's full arch dental implant solution eliminates the many problems associated with conventional treatments. The result is full dental function for less than half the cost of traditional bridgework of implants and in a fraction of the time.
