Midsommar. I loved the cinematography, and I thought it was done really creatively to bring a good message across.

We just enjoyed *Gemini Man*. I really liked how it poses the question: "What would you tell your younger self?" That's something I've contemplated a few times. The storyline was really good. It's a morality-based plot that makes you think.

I just saw *Maleficent: Mistress of Evil*, which is the best movie I've seen recently. I liked the CGI, and especially the wings on the Maleficent character.

My favorite movie of the last three months is *Once Upon A Time In ... Hollywood*. I've seen it three times. I like the cast of characters in the movie and the twist on reality. You're expecting one thing, but things don't quite go that way.

- Market exposure with no risk of principal loss when held to maturity
- Issued by Large National Banks
- FDIC Insurance Coverage up to the statutory limit

Market-linked CDs are typically longer-term investments. FDIC insurance is subject to FDIC limits. Principal invested in excess of FDIC limits is not insured and is subject to the credit risk of the issuer. Principal protection only applies if the CDs are held to maturity. If not held to maturity, a market-linked CD is subject to market risk, and trading in the secondary market may be thin or even nonexistent, and the price per CD may be less than par. Total payment at maturity may be less than what would be received if you had invested in the underlying asset(s) directly. Some market-linked CDs may limit participation in the underlying asset(s). Market Linked CD returns may vary from the indices' or assets' actual performance. Additional risks may apply based on the specific issue.
