

# What's your favorite style of music?

**Asked at Saturday farmers' market**

**Kristina Schierenbeck**  
botany professor

Early blues and jazz. Particularly protest music that came out of deep Mississippi from the '20s and '30s to World War II. It's heartfelt and has strong messages about things like hard living.

**Mike Hofstetter**  
therapist

I like a little bit of everything, including a lot of the local bands, especially the funk ones, like Smokey the Groove.

**Vanessa Zucker**  
jewelry designer

My favorite music is psychedelic surf rock. It brings me back to the era of the '60s and '70s. I always felt so connected to the oceans, and it reminds me of that.

**Nathan Velasquez**  
technician

If I'm trying to get active and energetic, I'll probably listen to some good rock 'n' roll. If I'm trying to hang out, chill and maybe study, I'll put on some low-fi hip-hop or R&B. If I'm trying to focus or unwind, I'll put on some classical. And a little jazz always soothes the soul.

Is it time to reduce your Stock Market exposure?

Learn how to get EQUITY like returns with the FDIC protection of a Certificate of Deposit (CD).

## Give your CD rates a Raise!

The Net Real Return on traditional Bank CDs after taxes and inflation often result in negative returns. Market-Linked CDs may stay ahead of taxes and inflation while providing the same level of FDIC Insurance coverage and principal guarantee when held to maturity.

**Call our 24hr/7day message line**  
**(530) 513-6255 for your**  
**FREE EDUCATIONAL GUIDE!**

- Market exposure with no risk of principal loss when held to maturity
- Issued by Large National Banks
- FDIC Insurance Coverage up to the statutory limit

Market-linked CDs are typically longer-term investments. FDIC insurance is subject to FDIC limits. Principal invested in excess of FDIC limits is not insured and is subject to the credit risk of the issuer. Principal protection only applies if the CDs are held to maturity. If not held to maturity, a market-linked CD is subject to market risk, and trading in the secondary market may be thin or even nonexistent, and the price per CD may be less than par. Total payment at maturity may be less than what would be received if you had invested in the underlying asset(s) directly. Some market-linked CDs may limit participation in the underlying asset(s). Market Linked CD returns may vary from the indices' or assets' actual performance. Additional risks may apply based on the specific issue.
