I am Scott Selig, and this is my partner Erik Palo, Owners of Selig with Coleen Thomas our Office and Finance Manager. This is a message from our Selig family, we hope everyone is healthy and safe these days. 2020 has been an ever-changing year sometimes daily for all of us. Our goal at Selig is to make sure that the public is aware of our concern for everyone's safety and that we follow ALL health guidelines mandated by the state and federal government. 2020 has seemed amazing to comprehend at times, and we may or not be done. Here is how we have dealt with 2020 so far, and will modify as mandated by all agencies; Here is what Erik, Coleen and I have implemented since start of Covid-19 In March we shut down 2 weeks, everyone sheltered and limited travel to essential only:

1 Selig paid ALL our employees 2 weeks pay before we shut down, most our employees have families, and roots in N CA

2 Resumed following all guidelines as per COVID 19 safety precautions. We also have a DME license, and deemed essential for walk in tubs, and safety showers for seniors

3 Temperature checks every morning before anyone leaves building to enter a customers home or business. masks are also worn out, along with hand sanitizer

4 Maintain social distance during construction of remodel project depending on the project

5 Wipe down and sanitize any areas we touched, and have HIPPA air filters, again, depending on project. (siding for example, not required since outside).

We will continue to follow all safety precautions. We have UVC commercial virus sanitizers, available for service or sale. Here are some of our valuable co-workers, and a little history of our Selig Family. Stay safe and we will all get thru this together.

Note: We still have some PPP funds available to pay for free labor while it last.
