In the line of duty, firefighters are faced with complex moment-to-moment decisions, negotiating the tensions between protecting personal safety, private property, and shared resources. Speakers at this event will present insights – gained from firefighters' stories – about the values that drive those complex decisions, and how they can help us better prepare for an increasingly uncertain future with fire.

Science Distilled, the lecture series created by DRI and The Discovery, makes cutting-edge science approachable through presentations on current and curious topics held at hip locations in a social atmosphere.
