Wonder why we invest in clean power?

We're community-owned, not-for-profit.

Our power mix is among the cleanest in the country and we continue to add renewables like solar, wind, biomass and geothermal to our balanced, reliable mix of green energy sources. We're committed to providing our customers with 60% renewable energy while reducing our greenhouse gases (GHG) by more than 60% by 2030. Our goal is to be net-zero GHG by 2040. We're working every day to improve local air quality by supporting energy efficiency, electrification of buildings and transportation and increasing the amount of clean, sustainable energy resources in our power supply.
