Best place to get a piercing

EXOTIC BODY

There are an abundance of fleshy appendages that hang off your body. The question is: What should you do with them?

If you're going to put some holes in them, you might want to consult the professionals at Exotic Body. We're talkin' nipple rings, ear piercings, dermal anchors, tongue webbing piercings and much more.

Open since 1990, Exotic Body's got you covered—in holes, tattoos or a combination of both. If your body's got it, they can probably pierce it.

Want to get your baby's ears pierced? The team can do that. Want to pierce your belly button so you can hang a hummingbird feeder from it? The piercing tools await your body.

There's only one thing Exotic Body says it won't pierce: its high standards of excellence and obligation to uphold state health and safety codes.
